Notes from Advisory Committee President Lynn Case

Where flowers bloom, so does hope." *Lady Bird Johnson*

Winter may have its charms, but there's nothing quite like the moment when the world begins to wake up from its cold weather slumbers. I especially enjoy my walks around the neighborhood looking at the beautiful crocus, hyacinth, snowdrops, and, my personal favorite, daffodils.

Daffodils, also known by their botanical name narcissus, are easy and reliable spring-flowering bulbs. They multiply quickly and return to bloom again each spring, year after year. They are not fussy about soil, will grow in sun or part shade and are not bothered by deer, rabbits or other pesky critters.

Yellow is the most common color for daffodils, but they also bloom in white, cream, orange and even pink. You can choose from several different flower styles, including trumpets, doubles, split-cups, large-cups, and jonquils. By planting an assortment of different types of daffodils, you can enjoy 4 to 6 weeks of these beautiful, carefree flowers every spring.

Lynn Case, Rutgers Master Gardener.

Spring has sprung and time to do a little clean up at our Center. Monmouth County Sheriff's Office Inmate Program once again came in to help spruce things up.. this year we had our hallway painted with an off white and blue color called "Cosmic Cobalt". Here are some interesting facts:
